

About Audio Vitamins

Audio Vitamins was founded in 2015 by Dave Clissold, a mix engineer with a background in both music production and theatre. The idea for the first release came about when sitting and trying to program Applescripts to automate a comparison process for ProTools to speed up his workflow.

The approach of the company is to design plugins that assist the user in their creative process, be it making their workflow more efficient with plugins, combining multiple processes into to streamline the mixing process or allowing the user to use their already, exceptionally well designed plugins in new ways.

In October 2016, in it's first year, Audio Vitamins' free version of their first release, Contra Free, was voted as one of the top 6 freeware utilities by MusicTech Magazine for 2017.
