Mode selectors

Pressing these will allow you to select the mode you want to use. Each mode has a different gain setting to help with structuring your mix properly from the start.

properly analysed the level coming in and applied the correct gain adjustment.

Instruments- Use this setting on every track that contains an audio file that is not a vocal.

Structure- by default this is in a 'Group' mode as indicated by the orange light.

Vox/Lead- Use this setting on all lead vocals and any solo or lead instruments you want to appear at the front of your mixes

Quick Start

Load Structure up by clicking on any insert and selecting structure from the list, you will find it listed either under

Audio Vitamins in Logic Pro and Ableton
Tools in Cubase
Other in Pro Tools
